OIL, GAS & MINING

Attention: Mr. James W. Smith, Jr.
Coordinator of Mined Land Development

Dear Sir:

Re: White Jack Uranium Mine
Sec. 15, T. 21S, R.14E
ACT/015/023
Emery County, Utah

This is to advise that Energy Benefits Explorations Corporation is the registered owner of the above mining claims, having purchased these from Universal Uranium Company (Universal Fuels Company) in 1980. Universal Fuels Company did not, however, inform us of any outstanding obligations to file additional information with your division. Our first notice in this regard was your letter of October 13th, 1981, which was forwarded to us by Universal Fuels Company.

Unfortunately, our Chief Mining Engineer, the person most familiar with the White Jack operation, has been involved in a serious airplane accident and will not be able to assist us for several months. However, our information from Mr. Lahusen is that all required information was filed and Division approval obtained. It is possible that a contract miner (Mr. McLeroy or Mr. Shumway) subsequently filed information and applications on behalf of Universal Fuels Company. We would appreciate your checking your records again to ascertain whether in fact your requirements have now been met.

Mr. James W. Smith, Jr.
Coordinator of Mined Land
Development

We wish to clarify at this time that we do not intend to "abandon" the claims and mine although no mining operations have been carried out since mid-1980. Late in August 1981 one of our geologists locked the cyclone fencing across the portal of the mine and covered all shafts. We wonder if this might have been done after your personnel inspected the site.

We thank you for your assistance in this matter, and would ask that you forestall any further action while we gather such information as you may require. Please advise what information and action you now require, having regard to the above details.

Yours truly,

CORPORATION
